

Are you using Webmethods or Cast Iron with Oracle CPQ Cloud?

From 31st March 2017 Oracle have announced the retirement of support for the Oracle CPQ Cloud (BigMachines) integration connectors for Webmethods and Cast Iron, and they will no longer host these solutions.

If you are using Oracle CPQ Cloud and have integrations that depend on Webmethods or Cast Iron you need to take action *now* to ensure your CPQ system will function correctly in the future.

Walpole Partnership have the skills and experience to help you identify your options, and implement an alternative integration safely.

Oracle's recommended solution is to replace the retired services with Oracle Integration Cloud Service (ICS), and we have fully trained consultants who are able to help with this transition, or can advise you on alternative approaches if required.

How can my company prepare itself?

1

Book a free introductory call with one of our consultants to establish the scope of your challenge.

2

Sign-up for an initial study and report. This will clearly establish your options, with full technical advice will and set out a top-level plan for replacement of WebMethods or Cast Iron. Contact us for a quote.

3

You may implement the findings of our report yourself, or we can deliver the solution for you. We will support your technical teams with expert advice, or deliver the whole project for you.
